

# SUFIAN MUMTAZ *Senior Full Stack Engineer*

safyanmumtaz@gmail.com 03064570107 Lahore, Pakistan
linkedin.com/in/sufian-mumtaz-585353221

## PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 4+ years of experience building production web platforms, AI-powered products, multi-tenant SaaS systems, and enterprise workflow applications. Strong hands-on expertise across React/Next.js, Node.js/NestJS, Python, Django/Django REST Framework (DRF), FastAPI, PostgreSQL, MongoDB, Redis, AWS, GCP, Docker, and Terraform. Experienced in AI/LLM orchestration, RAG, vector search, real-time systems, background processing, RBAC, secure API design, database architecture, and end-to-end cloud delivery.

## EDUCATION

**University of Gujrat,** *Bachelor of Science in Information Technology* 2018 – 2022

## TECHNICAL SKILLS

**Frontend:** React, Next.js, React Router, Redux, Redux Toolkit, RTK Query, Tailwind CSS, Material UI, Radix UI, React Flow, Recharts, Formik, Yup, React Hook Form, Zod
**Backend:** Node.js, NestJS, Express.js, Django, Django REST Framework (DRF), FastAPI, Flask, REST APIs, gRPC, WebSockets, Socket.IO
**Databases:** PostgreSQL, MongoDB, MySQL, MariaDB, Redis, Django ORM, SQLAlchemy, Mongoose, Sequelize, Lucid ORM
**Cloud & DevOps:** AWS, GCP, Docker, Terraform, CI/CD
**AI/LLM:** Anthropic Claude, RAG, Weaviate, Vector Search, Gemini, OpenAI, Whisper

## PROFESSIONAL EXPERIENCE

**Senior Full Stack Engineer,** *ABARK Solutions* 09/2025 – Present
Lahore, Pakistan

- Engineer end-to-end production features across React/Next.js frontends, Python/Django/DRF and FastAPI backends, PostgreSQL, AI services, cloud infrastructure, and deployment workflows
- Contribute to LawBridge, an AI-powered legal skills assessment platform, implementing secure APIs, student/mentor/admin workflows, RBAC, PostgreSQL data flows, assessment processing, and third-party integrations
- Implement the LawBridge assessment architecture around Anthropic Claude, RAG/Weaviate retrieval, calibration references, student memory, structured scoring, and server-side context orchestration for personalized AI feedback
- Build and refine secure authentication and authorization boundaries, including role/capability permissions, object-level data isolation, audit-oriented controls, protected credentials, and server-side handling of AI prompts and provider keys
- Contribute to AI-assisted property inspection workflows using React, FastAPI, PostgreSQL, media processing, Whisper, Gemini/OpenAI, background jobs, Cloud Tasks, and cloud storage
- Work across scalable SaaS architecture concerns including multi-tenancy, modular domain boundaries, asynchronous processing, real-time/operational workflows, API design, database modeling, and production reliability
- Support cloud-native delivery using AWS/GCP, Docker, Terraform, and CI/CD practices while collaborating with product, QA, design, and DevOps stakeholders

**Full Stack Engineer,** *Solutions Loft Pvt* 10/2023 – 08/2025
Lahore, Pakistan

- Owned and contributed to end-to-end delivery of production applications across React/Next.js, Node.js/Express/NestJS, databases, cloud services, and deployment pipelines
- Designed REST APIs, authentication/authorization, RBAC, business workflows, validation, database models, and third-party integrations for data-intensive applications
- Built reusable React/Next.js components and application workflows with maintainable feature boundaries, responsive UX, and predictable state management

- Worked with MongoDB and MySQL for data modeling, complex queries, aggregation pipelines, dashboards, and operational workflows
- Implemented asynchronous/background processing and real-time capabilities using Redis, queues, and Socket.IO where required by product workflows
- Contributed to multi-tenant capabilities with tenant isolation across authentication, public forms, reporting, shareable resources, and platform workflows
- Worked with Docker, cloud infrastructure, and CI/CD workflows to support repeatable deployments and reliable releases

**Full Stack Developer,** *Saldiri SMC Pvt* 09/2022 – 09/2023
Lahore, Pakistan

- Developed full-stack web applications using React.js, Node.js, Express.js, and MongoDB from requirements and Figma designs through production delivery
- Built responsive and reusable interfaces and backend APIs covering business logic, database operations, validation, and integrations
- Contributed to Getting Board with Formik/Yup validation, Quill.js rich-text email templates, Redux state management, and search/filter workflows
- Collaborated with QA and stakeholders to troubleshoot defects, refine requirements, and deliver production-ready features

## PROJECT HIGHLIGHTS

**LawBridge,** *AI-Powered Legal Skills Assessment Platform*
Technology: React, Next.js, TypeScript, Django, Django REST Framework, PostgreSQL, Anthropic Claude, RAG, Weaviate, AWS, Stripe

- Engineered the assessment workflow around a four-layer AI context architecture: system prompt, RAG knowledge retrieval, calibration references, and per-student memory
- Implemented server-side orchestration that retrieves skill/scenario knowledge and calibration context, injects student history, sends structured requests to Claude, parses scoring/feedback, and persists assessment state
- Supported enterprise RBAC, student data isolation, secure credential handling, configurable permissions, AI/video/audio assessment workflows, and subscription payments

**AI-Assisted Move-In / Move-Out Inspection Platform**
Technology: React, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, Gemini, OpenAI, Whisper, FFmpeg, GCP, Cloud Tasks, Docker, Terraform

- Contributed to a multi-tenant inspection platform that converts property video, photo, and audio inputs into AI-assisted findings and bilingual PDF reports
- Worked across presigned object-storage uploads, IndexedDB offline queues, FFmpeg media processing, Whisper transcription, multimodal AI analysis, structured findings, evidence handling, and background-job recovery
- Implemented tenant-scoped APIs, inspection lifecycle workflows, uncertainty review, move-in/move-out comparison, report sharing, signed webhooks, and cloud deployment architecture

**TAPMS,** *Enterprise Multi-Tenant Property Management Platform*
Technology: React, Node.js/NestJS, Redis, Socket.IO, REST APIs, Multi-Tenant SaaS, RBAC

- Worked on a workflow-heavy property/hotel management platform spanning property operations, reservations, guests, housekeeping, maintenance, inventory, purchasing, inspections, compliance, workforce operations, and reporting
- Contributed to modular, tenant-isolated application architecture with RBAC, reusable business modules, pagination/filtering, soft-delete/restore patterns, background processing, and operational workflows
- Supported real-time communication and operational updates through Socket.IO/Redis-backed workflows, dashboards, notifications, ticketing, and task-oriented processes

**Aramco CMS & Employee Onboarding Platform**
Technology: Next.js, NestJS, MongoDB, JWT, SMS 2FA, Recharts

- Developed CMS/backend workflows supporting employee onboarding across web and mobile applications
- Implemented JWT authentication, SMS-based 2FA, user/admin and department management, dashboards, analytics, AI Buddy integration, and MongoDB aggregation pipelines for employee scoring and ranked leaderboards

**Polypo,** *Digital Avatar & Virtual Try-On Platform*
Technology: Next.js, Flask, Python, AI Models, Microservices

- Worked on microservices-based digital avatar and virtual try-on workflows covering authentication, user management, avatar generation, and AI model integrations
- Built Next.js experiences and Flask integrations that process user images/attributes to support generated digital avatars and brand-portal experiences
